Updated by Master Saint Germain on 13 September 2020

I AM Saint Germain.

Today I have come to remind you that the Lord's Grace for performing the 'Spiritual practice with the Violet Fire' is still valid, albeit selectively. At present, it is valid only for those people who can conduct the Divine Light, have the necessary purity of their bodies and are aspired towards the study and implementation of the Divine Laws in their life and towards observing the Lord's Commandments.

This Divine Grace is given to you as an aid to work off your negative karma more easily, in a shorter time and in greater completeness. The effect achieved with the regular quality performing of the 'Spiritual practice with the Violet Fire' in comparison to the standard working off of the negative karma is like comparing driving on the highway to driving on a dusty rural road.

For the Grace to have this effect, however, during the reading of this Spiritual practice, it is necessary to fully focus on the text that you are reading, filled with the feeling of Divine Love towards the Living Life, without any distracting thoughts and feelings, which could come over you. Going back to the analogy with the road, it is the same as driving on the highway – you need to focus on the road without looking away from it because the car may turn a little off the road, and when you are driving at high speed, this is much more dangerous.

You can always invite me to attend your service before reading the 'Spiritual practice with the Violet Fire' and ask for support or help to be given to you from Above to be successful in being focused during your entire Service. It would always be good before you start any work in spirituality to clearly state the motive for which you are starting it – that you are doing it to support the Living Life, and also say what you want your energy to be used for. And give your gratitude and Divine Love to the Father One for the Great Grace that you are given.

And when you finish your daily Service, whatever your spiritual practice, remain in peace and calm as long as you want and can afford, alone, immersed into the depths of your heart, emanating your Joy, Peace and Divine Love to the Living Life in the Universe.

The daily repetition of your Service develops spiritual qualities such as Perseverance, Purposefulness, Self-discipline and helps to accumulate your treasures in the Heavens, your good karma. And it also leads you to a state of Balance and Harmony, in unison with the real world of God so that you fully experience it at least once a day and then have the pattern that you will strive to preserve during the rest of the day. This practice should be repeated every day until the state of peace becomes your inherent, constant behaviour and emanation regardless of your life circumstances and environment.

I wish you success in your daily work on your self-perfection.

I AM Saint Germain
